EDUCATION

Bachelor of Software Engineering

Bahria University, Karachi

June 2026

Pre- Engineering,

Bahria Model college, Majeed SRE

2021

CERTIFICATIONS AND BADGES

Meta Back-End Developer Professional Certificate (02/2025 - 04/2026)

Completed a comprehensive 9-course professional program by Meta to prepare for entry-level back-end developer roles. Covered servers, databases, APIs, Python programming, version control, and SQL-based data modeling. Gained hands-on experience with Django, RESTful API development, and a full-stack capstone project. Strengthened skills in data structures, algorithms, system design, and modern web development practices.

PROJECTS

HBL Car Loan Calculator

- A web-based loan simulation tool that allows users to calculate EMIs based on vehicle price, down payment, and loan tenure for HBL car financing.
- Includes real-time EMI computation and AI-based forecast charts to analyze static, increasing, and decreasing interest rate scenarios.
- Features a modern, responsive interface with PDF export functionality, built using HTML, CSS, JavaScript, Chart.js, and jsPDF.

Eye Disease Classification (AI Based)

- A Flask-based deep learning application developed in Python using TensorFlow, designed to classify various eye diseases from medical image data.
- Utilizes a trained CNN model with preprocessing via NumPy and Pillow, providing accurate classification and diagnostic insights.
- Supports local deployment with virtual environment setup, and uses a Kaggle dataset for training and evaluation of disease detection performance.

Analytics Dashboard (React.js)

- A modern React.js-based analytics dashboard designed to visualize key website metrics such as visits, bounce rate, session duration, demographics, and traffic sources through an intuitive UI.
- Features interactive charts, metric cards, and sidebar navigation, using Recharts / Chart.js for dynamic data visualization and mock JSON/state data for demonstration.
- Built with React.js, JavaScript (ES6+), HTML5, and CSS3, the project offers a scalable structure that can easily integrate with a backend API or the Google Analytics API for live data.

Career & Counseling Portal

- A web-based platform developed to help students and professionals explore career paths, schedule counseling sessions, and access educational resources for career growth.
 - Includes planned features such as user authentication, counselor appointments, career articles, live chat, and an admin dashboard for content management.
-

- Currently in active development — frontend built with HTML/CSS, while PHP-MySQL backend integration is pending due to configuration issues and ongoing enhancements.

EXTRACURRICULAR

Cricket (Professional Player)

- | | |
|--|-----------|
| • PCB Under-19 District Champion | 2021 |
| • Net Bowler at National Bank Stadium, Karachi (for International Teams & PSL) | 2021–2025 |
| • University Cricket Team Player | 2022–2026 |

TECHNICALSKILLS

Programming Languages → Python | JavaScript | HTML5 | CSS3 | SQL | C# | Java
Frameworks & Libraries → React.js | Django | Bootstrap | Chart.js | .NET (ASP.NET Core) | Node.js
Database Management → MySQL | MonogoDB
Version Control & Collaboration → Git | GitHub
Tools & Platforms → Visual Studio Code | Google Colab | Jupyter Notebook | Figma | SMS19 | Visual Studio
Data & AI Tools → TensorFlow | NumPy | Pandas | Pillow
Web Development → RESTful APIs | MVC Architecture | Frontend & Backend Integration
Other Skills → Responsive Web Design | Data Visualization
